M'KELLAR'S AMENDMENT

An amendment offered by Senator McKellar to the sedition bill, notwithstanding its defeat without demand for a roll call on viva voce vote, is an interesting contribution to the legal lore of the nation as well as to the archives of the senate document room, where rest, undisturbed and forgotten in pigeonholes, products of other minds no less fertile, the products even of statesmen no less great than the junior senator from Tennessee. It is interesting even as a post mortem because it deals with a subject that has had much attention recently, and because it gives promise of making frequent if not welcome appearance when least expected or

The senator's amendment provided that: "Every citizen of the United States who directly or indirectly commences or carries on any verbal, written or printed intercourse or correspondence with any other person or persons, whether citizens or aliens . . . in an attempt, either peaceably or by violence to overthrow, disintegrate, or in any manner do sway with or set aside the government of the United States, or all governments generally, including the United States, shall be deemed and held as adhering to the enemies of the United States, giving them aid and comfort; and upon conviction, shall be fined not less than \$5,000 for each offense and imprisoned not less than one nor more than 10 years, or may in lieu of such fine and imprisonment, in the discretion of the judge, be deported permanently to the island of Guam or to any island in the Philippine archipelago belonging to the United States which may be set aside by

visions of this act." The question that arose from the wording of the amendment was what the senator had against the people of Guam, and natufally be disclaimed having anything against them when asked the pointed question by Senator Kenyon.

As to Senator Thomas' apprehension that Guam might not e big enough and that the senator should insert a continent in his amendment, Senator McKellar replied that if Guam became overcrowded, we might "move the people of Guam out and give them a better home somewhere else." but he apprehended no difficulty over the question of space, for, as he said, "even a small as might peaceably undertake the disintegration of our present form of government should be sent to the island of Yap.

Senator Borah, with his usual failure of comprehension, said ethought "I could deport every unconditional ratifier of the large thought the amendment which the senator is offering, for I ld such proceedings would finally change and probably destroy to ye would not say Senator McKellar had in the senator of the large that the salary as chairman as a salary as chairman as chairman as a salary as chairman as chair

the citizens of his home town, but from expressions heard on many sides there has been a large number of persons who, because the senate has not ratified the treaty unconditionally, would abolish the senate after having a number of senators shot before sunrise. Assuredly any such expression under the terms of his mendment would make some of his strongest supporters liable to prosecution and life tenure in Guam or Yap, or whatever place that might be found commensurate with the offense.

THE RAILROAD QUESTION

Only one who has not observed campaigns for the past 20 years, or drawn no conclusion from what has transpired in that ime will say that Mr. Bryan is not destined to be a tremendous factor in the approaching campaign for the nomination of a candidate for the presidency on the Democratic ticket.

Within that time Mr. Bryan three times was the nominee: once he succeeded in nominating a candidate after another received a majority of the votes in the convention, and the most tragical showing the party made within that time was when Mr. Bryan's influence was at its lowest point since he has been in public life, and the candidate was selected over his opposition and the platform written contrary to his views.

Mr. Bryan will not command his following solely upon his advocacy of immediate ratification of the treaty with such modification of the reservations as the majority will agree to accept, as against President Wilson's proposal to submit the question to a "solemn referendum," necessitating a delay of at least 14 months and even possible ultimate defeat. He will command a strong fol lowing among the labor people who advocate public ownership of railroads. Much of the denunciation that he will receive for his stand on the treaty will come from those whose association with the vested interests would make them especially uninerable in they should speak the sentiment that is uppermost in their mind-

It is unfortunate that the government did not have a fair opportunity to demonstrate the theory of public control. Illad the railroads been under the direction of the government for all time, with the theory that they were to be builded up into great public Institutions for the benefit of the public, there would have been a wholehearted effort to make the best of the situation. The offi cials would have worked for one master—the government.

But under the system adopted the roads have been operated for the benefit of an absentee landlord. Even with the roads under the titular control of the government, the best of the cin-

ployes have been compelled by ejecumstances to serve two masters They have been obliged to keep a lookout in both directions They have been compelled to give the government the best service. they were capable of rendering, but keeping always in mind the early return of the roads to their owners and the possibility of serving one so well that they would find themselves in disfavorwith the other.

This is the difficulty the officials have labored under, but regardless of circumstances there is a stronger sentiment now or private ownership than there has been for years, and the public ownership theory received a decided setback from the experience of the past few years. The subject, however, is by no means a dead issue and is destined to occupy a larger share of attention as the campaign progresses than seems likely now, with multitude of other things engrossing the public attention

QUESTIONS AND ANSWERS

Q. What artist is held to be the father of painting? M. V. B.

A. The term has been applied to Michelangelo Buonarotti, who was born in Florence, Italy, in 1564. His greatests works were done in Rome where he founded a school which was altogether dominated by his personality. Some of his famous paintings are in the Vatican at Rome, notably "The Last Judgment," in the Sistine chapel, on which Michelangelo worked seven years. In spite of his ability as a painter, however, it was as a sculpter that he wished to excel.
